Thank you for your patronage!

We are confident that our excellent products and service can satisfy you.

For your own safety, please read this user manual carefully before installing the device.

In order to install, operate, and maintain the lighting safety correctly, we suggest that the installation and operation should be done by the verified technician and follow the instruction strictly.

CAUTION!

Unplug mains lead before opening the housing!

Everyone involved with the installation, operation and maintenance of this device has to:

-be qualified

-follow carefully the instructions of this manual

INTRODUCTION:

Thank you for having chosen this professional stage light.

You will see you have acquired a powerful and versatile device.

After unpacking, the accessories for each lamp should include:

1. One powerCON cable
2. One 3-Pin/5-pin XLR cable
3. One safety rope

(Flight case and Clamp are optional, please contact your dealer.)

Please check carefully that there is no damage caused by transportation. Should there be any questions, please consult your dealer and don't install this device.

SAFETY INSTRUCTIONS

1. The maximum working environment temperature cannot exceed 40°C, and the minimum cannot be lower than -20°C.
2. Do not place the product in a place where it is easy to loose or vibrate.
3. In order to avoid the risk of electric shock, the maintenance of the product should be done by professionals.
4. Check whether the voltage, frequency and other electrical data of the light power supply line are consistent with the voltage and frequency parameters marked on the light, so as to avoid voltage mismatch and burn out the light.
5. When the light is in use, the power supply voltage change should not exceed $\pm 10\%$.
6. The light is designed according to the type of protection against electric shock, and the light should be connected to a power supply system with sufficient grounding. And the earth wire of the light must be connected with the earth wire of the power supply system, and the earth mark on the metal shell of the light must be securely connected with the light holder.
7. Please do not look directly at the light source, as it may damage the retina of the eye and cause blindness.
8. Do not touch the device at will during use to avoid burns caused by high temperature.
9. Please do not project the beam on combustibles. The distance between the light

output port and the surface of combustibles must be greater than 15 meters.

10. The light should be installed in a well-ventilated place, with a distance of 50 cm or more from the wall. Also, check that the fans and vents are unobstructed.

CLEANING AND MAINTENANCE

1. Intermittent use will effectively prolong the life of the lamp.
2. In order to obtain good ventilation and lighting effects, pay attention to cleaning the fan, fan net and lens frequently.
3. Do not wipe the housing of the light with alcohol or other organic solvents to avoid damage.

STATEMENT

When the product is shipped from the factory, its performance is intact and the packaging is complete. All users should strictly abide by the warnings and operating instructions stated above. Any damage caused by misuse is not covered by the company's warranty. Failures and problems caused by ignoring the operation manual are not within the responsibility of the dealer.

Note: Based on our company's policy of continuous product improvement, the data contained in this manual may change in the future, and will no longer notify the changes. The company reserves the right to change the relevant specification data when the product is improved.

The publisher of this manual will not assume any responsibility for the consequences of such information.

Technical parameters

Power Supply

AC100 - 240V, 50/60 Hz

Power consumption: 550W

Light Source

USHIO NSLU7A 420W

Average life: 4000 hrs long lifespan

Color temperature: 6800K

Effect

Beam angle: 2°, 750000lux@10m

Lens diameter: 180mm

Color wheel: 13 colors + white

Fixed gobo wheel: 15 gobos + white

Prism: 8-facet+8-facet+24-facet

Prism overlay, 7 types prism

Frost filter for soft-edge projection

Focusing: 0-100% linear

Dimming: 0-100% linear

Strobe: 1-12 Hz, random and pulse flash

Control

Pan/Tilt: 540/270°

Control mode: DMX512/RDM

DMX channels: 16

Powercon: Seetronic Power in & out

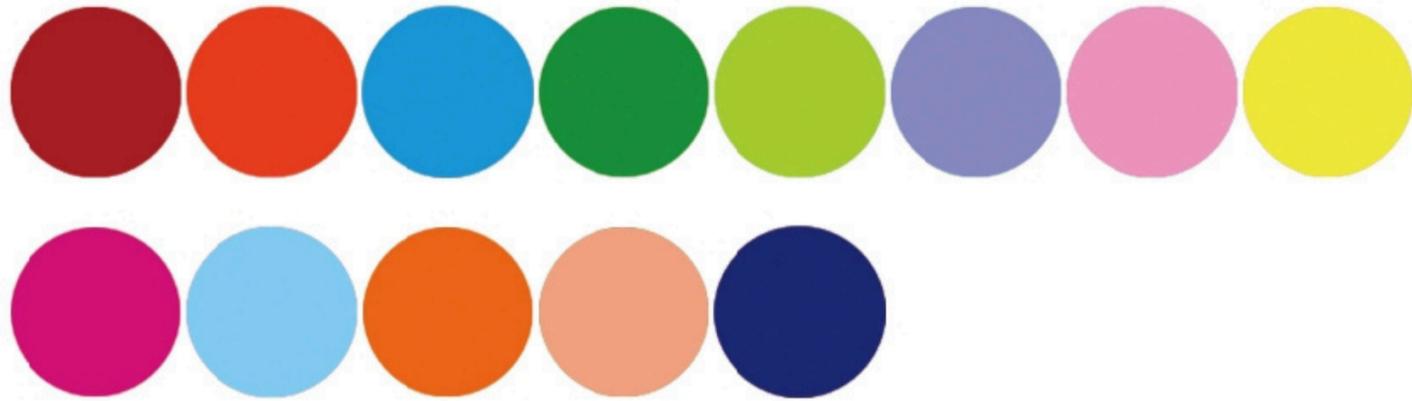

XLR in & out: 3 pin/5 pin

IP Rating: IP66

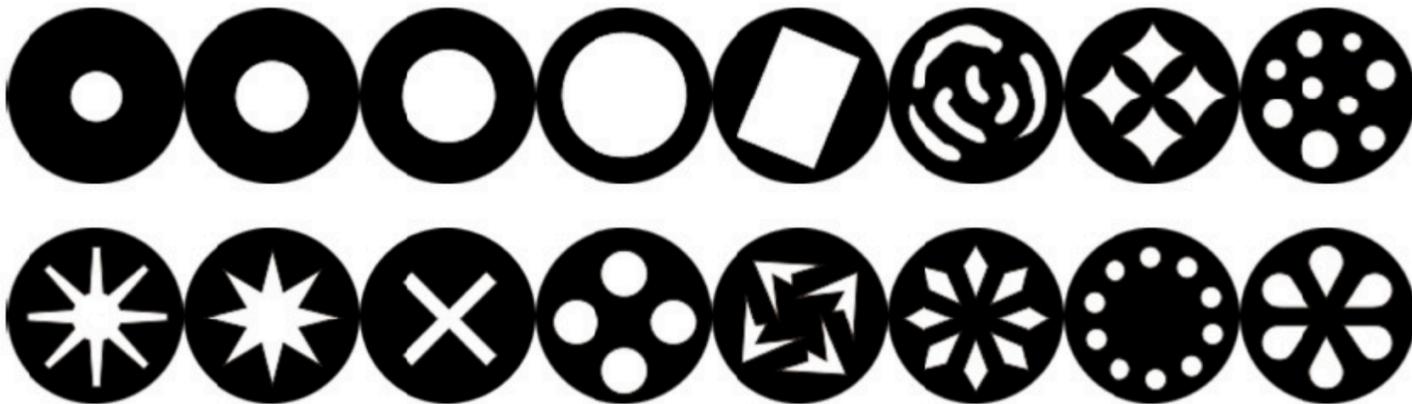

Packed

Net weight: 20kg

FUNCTIONS OF BUTTONS

Reversal of the display

To activate this function, press UP and DOWN keys simultaneously while the display is in the rest mode. This status will be memorised and maintained even for the next time it will be switched on. To return to the initial state, repeat the operation all over again.

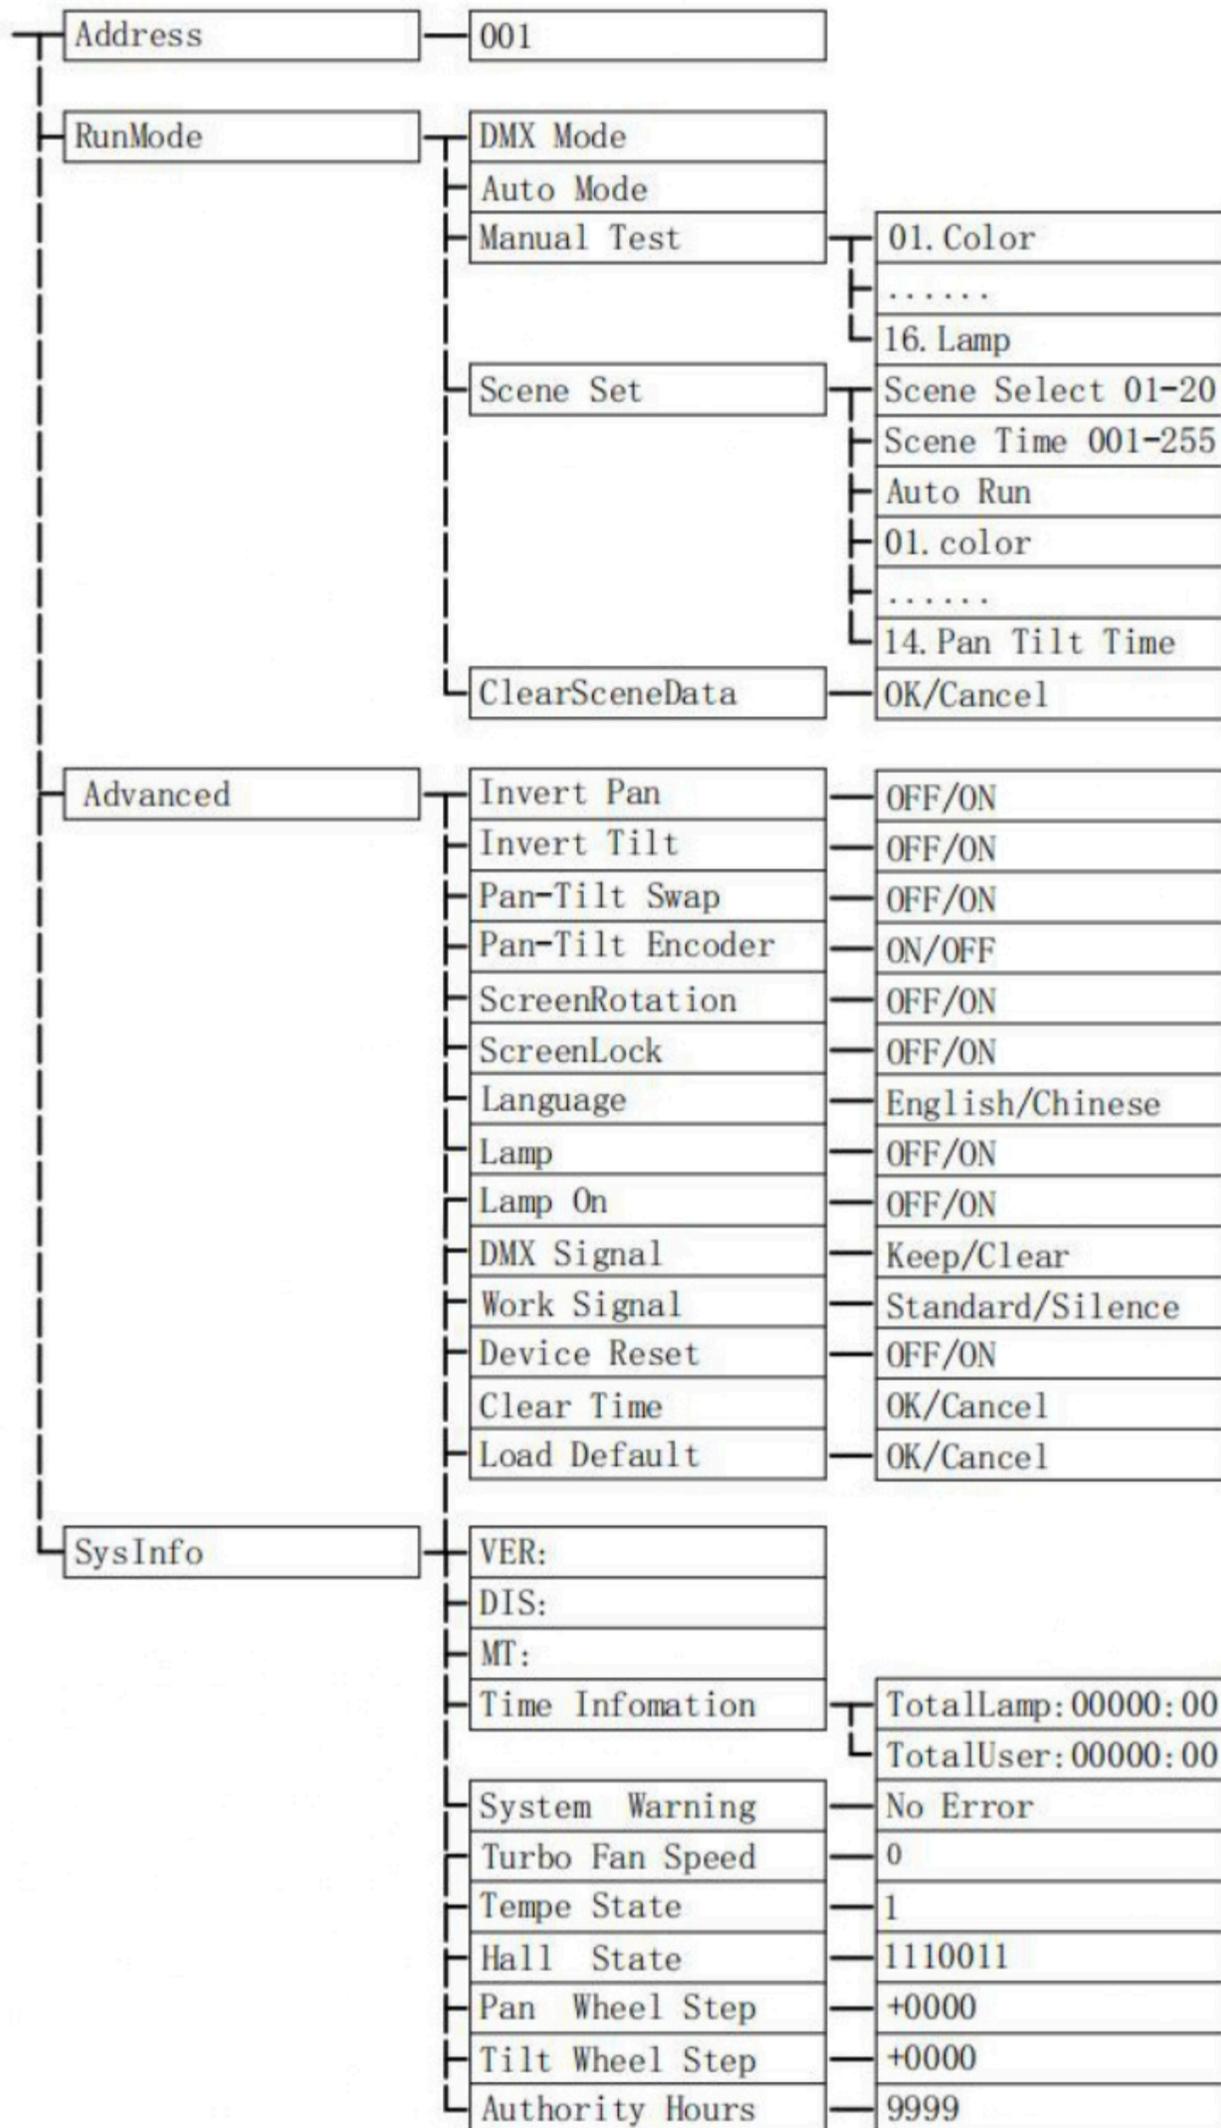

Button description:

	 UP	Increases the value displayed (with auto-repetitions) or passes to the previous item in a menu.
	 DOWN	Decreases the value displayed (with auto-repetitions) or passes to the next item in the menu.
	 LEFT	Return to the top level.
	 RIGHT	
	 OK	Confirms the displayed value, or activates the displayed function, or enters the successive menu.

Advanced Menu:

1. Long press the left button for 3 second on boot screen.
2. Enter the password "988" after a new window pops up.
3. Can adjust the pan tilt initial position and reset the hours of fixture use.
